Delta-E20

Delta-E40

* Requires flow rate adjustment to acquire 60mj/cm³

Delta UV offers you a healthier, cleaner swimming pool environment

- Completely disinfects and inactivates bacteria, viruses, algae and protozoa
- Drastically reduces chemical use
- Works in harmony with a salt water chlorinator for perfect water treatment
- Lower chlorine demand enabling reduced chlorine levels
- No chlorine smell
- Eliminates all nasties on contact including chloramines and especially trichloramines (NCL³)
- Drastically reduces the need for superchlorination
- No more red eyes, dry skin or mucous irritation
- Easier pool maintenance
- Prolongs the pool and equipment life – reduces degradation of the pool's surface and equipment (less oxidation required)
- Environmentally friendly
- No harsh or dangerous by-products or contaminants
- Saves water and electricity
- Long lamp life – 12 months full warranty – second year pro-rata
- Safe with solar pool heating and automatic pool cleaners
- Chlorine free alternatives available
